

PATCHWORK

Keeping Technology Simple

BlackBox Advance™

The upgradable BlackBox Advance includes water and dust proof casing, built in GLONASS, GPS, Terrain Compensation, an On board modem, Headland Control and Headland Warning.

With advanced recording the BlackBox Advance provides the ability to save all jobs, A-B lines and allows the storage of multiple paused jobs. In conjunction with WebTrack3 it also allows additional information to be recorded with every job, for example: weather, product used, rate applied. It also includes Enhanced Guidance and In-Built Section Control.

Additional upgrade options in the Advance include Spreader Auto Shut Off, Variable Rate Application, Section Control and the ability to upgrade to the BlackBox Evolution.

The BlackBox range of products integrates with a huge range of agricultural equipment including spreaders, sprayers, drills and exchanges data with WebTrack3 as well as other major Farm Management Software packages.
